

ACTIVITIES AND CLUBS START AT FULL BLAST

NAVAL UNIT WILL BE DEMobilized SHORTLY

Officially Announced at Five
O'clock Formation Thursday
All Successfully Pass Exam-
ination for Confirmation of
Ratings

ARMY CHANGES PLANS

All rumors which have been current
concerning the dismissal of the naval
unit at the Institute were dispelled at
the evening quarters formation Thurs-
day night when Ensign Dunbar read
orders announcing that the unit would
be disbanded. Nearly every member of
the unit had previously submitted an
application for transfer to inactive duty
and it was stated that they would prob-
ably receive their papers some time next
week. All those who did not apply for
transfer will be sent to various train-
ing stations.

All men will be given a physical ex-
amination before going on inactive duty
and the first of these began Friday when
the 1st company reported to the medi-
cal officer at the naval aviation dis-
pensary. No definite ruling was an-
nounced concerning uniforms but it was
officially stated that the men would
be allowed to wear them for two or
three months after dismissal. The bal-
ance of the \$100 allotment for clothes,
paid to every enlisted man in the navy,
which has not been spent by the mem-
bers of the unit will be returned to
them at the end of their enlistment
period.

All men were successful in the exam-
ination for the confirmation of ratings
which was given by the naval examining
board on Monday and as a result they
will receive two months' pay annually
while on the reserve list.

The plans for disbanding the S. A. T.
C. have been modified slightly. Orders
have been received to have all men out
by the 21st. The first class will prob-

(Continued on page 3)

MR. BERNARD O'DALY DIES

Everyone at the Institute regrets to
learn that Mr. Bernard O'Daly '18, in-
structor at Technology, passed away
last Monday. Mr. O'Daly was taken
ill just before Thanksgiving with a bad
cold. His condition was not considered
serious, and he was improving when
pneumonia developed Sunday. Monday
Mr. O'Daly expired. Funeral services
were held Thursday morning at nine
o'clock.

BERNARD O'DALY

Mr. O'Daly was born June 11, 1897.
He prepared for Technology at the Bos-
ton English High School and entered the
Institute as a freshman in the Chemical
Engineering Course. He was a member
of the Chemical Society, the E. H. S.
Club, and the Catholic Club. In his senior
year he was president of the Chem-
ical Club. Since he graduated Mr. O'Daly
has been an instructor in the Depart-
ment of Chemistry at Technology.

COMMUNICATION

Editor of The Tech,
Dear Sir:

May I, through your columns, express
a feeling which is current amongst the
upperclassmen in the Institute?

The military organizations at Tech-
nology have so restricted the liberties of
their members that practically no time
has been devoted to class organization.
The seeming wild reports that have sug-
gested themselves to the men of the
units have at last been confirmed by the
proper authorities and the demobilization
of the S. A. T. C. is now only a question
of time. Now would be the time to
get the class representatives who were
elected last year together and take into
consideration the reorganizing of the
various classes.

May I suggest that these men meet
and prepare ballots for the next election
of officers which could be held during
the registration period for the coming
term? This would save time and start
things going immediately when the stu-
dents come back to a normal Technol-
ogy. It would perhaps be advisable to
postpone freshman elections to allow the
men entering in January to become ac-
quainted with their classmates an en-
vironment.

TREBOR '20.

MAJOR CHILTON TO LECTURE

Major A. W. Chilton, is to lecture to
the students in the War Issues courses
next Monday, Tuesday, and Wednesday,
on "European Militarism." Major Chil-
ton is a teacher of History at West
Point and one of the authors of "Euro-
pean History, 1862-1914." While in the
city he will reside at the Harvard Club
on Commonwealth avenue.

Dr. Pearson, head of the English De-
partment, says that men not taking the
War Issues Courses will be permitted to
attend the lectures if they so desire.
The lectures will be given in Room 10-
250, the first of which will be held on
Monday at two o'clock, the second on
Tuesday at four, and the last on Wed-
nesday at four.

BA-BA COATS ALLOWED

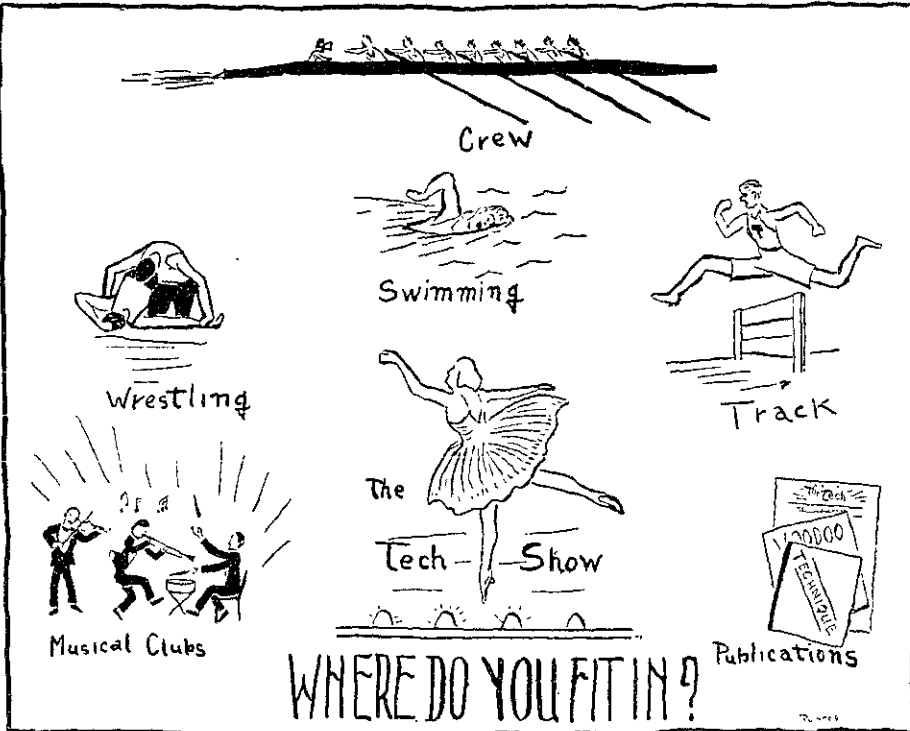

M. I. T. Battalion May Also Wear Their Army Coats

Definite word has been given out by
Major Turner in regard to Ba-Ba coats.
It was thought for a while that the
men in the M. I. T. Battalion would
be requested to buy the regulation army
coats, but plans regarding their pur-
chase did not materialize. It is now
announced that both Ba-Ba coats and
the regular private's coat may be worn
for drilling. Arrangements have been
made with the Provost Marshal General's
department so that persons wearing
"the coats of the wooly lining" will not
be arrested while in Boston. It seems
also that the plans made by Colonel
Cole for the purchase of these coats did
not turn out as expected, and for this
reason the fellows will be permitted to
buy theirs wherever they wish.

So that the battalion will present a
good appearance when drilling it is plan-
ned to have the men wearing the pri-
vate's coats drill in one division and the
men in the Ba-Bas drill in another. This
plan offers the opportunity of competi-
tion, and in the estimate of many of
the fellows pretty good drilling will be
the result, as one group will try to out-
strip the other.

Mr. Fill Guekes changed his middle
initial from E. to I. Wednesday when he
downed two Mess Hall dinners in a row.
(Editor's Note—His initials used to
be P. E. G.)

Will young man who found pocket-
book containing reference card of the
Massachusetts General Hospital, please
get in touch with THE TECH office.

BRITISH EDUCATORS MEET AT TECHNOLOGY

Sir Henry Miers Speaks To As-
sembly On "The Organization
Of Engineering Education in
Great Britain."

JOHN F. HAYFORD PRESIDES

Dr. Arthur Everett Shipley, Sir
Henry Miers, Reverend Edward Mew-
burn Walker, Sir Henry James, Dr. John
Joly, Miss Carolina Spurgeon, and Miss
Rose Sidgwick, composing the British
Educational Mission to the United
States arrived in Boston Friday. The
program as arranged by Professor A. E.
o'clock yesterday with a session at two
o'clock yesterday with a session at the
Institute. President John F. Hayford
presided. President Richard C. Macru-
rin of Technology delivered an address
of welcome on behalf of the Institute.
This was followed by a similar address
for the Society for the Promotion of En-
gineering Education by Pres. Hayford.
A member of the British Mission then
made a response to these speeches. "The
Organization of Engineering Education
in Great Britain" was described by Sir
Henry Miers; President Charles S. Howe
of the Case School of Applied Science
told of this in America. This completed
the afternoon meeting. At seven the
delegates were entertained at dinner.

Pres. Hayford presided at the Satur-
day morning session which was called
at ten o'clock. A discussion on the "Ef-
fect of the War on Engineering Educa-
tion in America" was carried on by C.
R. Mann of Technology and Dr. John
Joly, who spoke on the British side of
the question. An informal discussion
was held afterward. At twelve thirty
luncheon was served.

At two this afternoon Rev. Edward
Mewburn Walker will speak on "The
Liberal Element in Engineering Educa-
tion in England. Prof. George F. Swain
will reply from the American point of
view. There will be a discussion and
then adjournment.

The Technology professors who are on
the committee are Professors Kennelly,
Spofford, Tyler, Goodwin, Talbot, Bur-
ton, Allen, Wilson, Sedwick, Miller and
Peabody. The officers of the S. P. E. E.
are as follows: President, John F. Hay-
ford of Northwestern University; Vice-
President, John T. Faig, of OhioMech-
anics Institute, and E. R. Maurer of
the University of Wisconsin; Treasurer,
W. O. Wiley of New York City; Secre-
tary, F. L. Bishop, University of Pitts-

(Continued on page 3)

INTER-FRAT. COUNCIL MEETS

Last Tuesday night Mr. Walter Hum-
phreys called an official inter-fraternity
council to discuss conditions at the In-
stitute. The council met in the Regis-
trar's office. Representatives from all
the fraternity chapters except Chi Phi
were present.

Owing to the fact that all the dele-
gates were not official, the scope of ac-
tion was limited. John J. Hines '21 was
elected temporary chairman and Ken-
neth Akers '20 was elected secretary.
The advisability of adopting "rushing"
was discussed and it was decided to al-
low it at the Institute.

Another meeting was called for Tues-
day, December 10th at 6.30 in Room
3-213, and all delegates are urged to be
present.

M. I. T. A. A. HOLDS MEETING

Despite the fact that many members
of the M. I. T. A. A. are not in Tech-
nology at present, a meeting of those
present was held last Monday night. The
first event was the election of Henry
Pierce as temporary chairman, and Paul
N. Anderson temporary secretary. Prac-
tically the whole time was spent in dis-
cussing the prospects of the various
teams. The managers were directed to
issue a call for candidates in the near
future, so that they may be classified
for next term. Richard McKay, man-
ager of the swimming team, was ap-
pointed to have cards printed with all
the activities listed on them. These
cards are to be distributed among the
students and each man is expected to
fill out the activities he would natu-
rally be most interested in. These cards
will be handed back, and it is hoped
that in this manner sufficient enthusi-
asm can be aroused to make the activi-
ties a success.

STONE AND WEBSTER BEGIN RECLAMATION WORK HERE

The Naval Aviation Receiving Ship, a
part of the Harvard Co-op. Building, is
being made ready for its original use
as a pool room and bowling alley, now
that the aviators are through with it
by Stone & Webster.

When the aviators were using this
room as a barracks the alleys were
boarded over and beds installed. The
work of renovation is nearly completed.
Stone & Webster are also repairing
Walker Memorial Hall dining room and
the dormitories, the Delta Tau Delta
and DKE sections are now already
for use. As yet it is not known
whether the S. A. T. C. buildings will be
torn down, but it is expected that the
Army Quartermaster will be able to find
use for at least some of them, for to
raze the barrack soon after their erec-
tion would involve a large financial loss
to the Government.

TECH SHOW TO APPEAR AND ALSO TECHNIQUE

Plans For Tech Monthly, Mu-
sical Clubs, Track, Swimming
Team, Crew And All Other
Organizations Being Made

MUCH SPIRIT SHOWN

The new year will see a rejuvenation
of Technology's traditional activities.
All of the old organization are expected
to take part in the Institute life and
each will be better than it was a year
ago in the minds of their leaders.

Tech Show is rapidly getting under
way under the guidance of E. P. White-
head '20. Several plays are being writ-
ten, Jesse Stam '20 deserving mention.
Most of last year's staff and cast have
left Technology and are now in the ser-
vice. The show is lucky to have "Ken"
Akers '20, S. A. T. C. and "Freddie"
Britton '20 in its midst and they will
undoubtedly feature in the coming
Show.

Technique 1920 will be published as
usual in Junior Week. This volume is
to be quite different from previous ones.
The customary Senior Portfolio will not
be omitted but the remainder will be
quite changed. Instead of dividing the
volume into classes the management
hopes to make it the year-book of
Technology and All-Technology. In-
formal snap-shots of men from all
classes are desired to illustrate the book.
As there are several vacancies on the
board competition will be held for men
in the class of '20 and members elected
to the board. Competition for assistant
business manager will be open to sopho-
mores beginning the first week in Janu-
ary. Possibly other positions will be
opened. Contracts have already been
signed for the paper, printing, binding,
etc., and work on the publication is now
under way.

More fellows are beginning to come
out for THE TECH and those who have
been out longest stand the best chance
of being elected to the staff.

Technology Monthly will probably
not reappear until next fall, but there
is no doubt that it will be resumed un-
der the name of "The Voodoo."

The musical clubs are proving them-
selves among the most active organiza-
tions by wasting no time in getting
started. Trials for the Banjo, Mandolin
and Glee Clubs will be held on Thurs-
day and Friday, December 12th and 13th
in room 10-250 from six to seven o'clock.
Freshmen who wish to compete for busi-
ness positions will report to the office
of the Musical Clubs on the second
floor of the student activities building
at six o'clock on Wednesday, December
11th. Those who intend to go out for
these clubs would do well to watch the
bulletin boards in the main building for
posters and notices. The publicity man-
ager of these organizations expects a
large number to turn out for the trials
next week. Those who were in the
Naval Unit Orchestra and Jazz Band
will be sure to turn out, and although
unsuccessful in raising an orchestra, the
S. A. T. C. has lots of good talent, ac-
cording to the manager of the clubs.

More men are showing up for Track
and Coach Kanaly expects to turn out
some good runners. He urges all who
can to come out and emphasizes the
fact that no previous training is neces-
sary.

The Crew expects to start work the
beginning of January. The rowing ma-
chines are to be brought from the B. A.
A. boat-house to the Institute and in-
stalled in the basement. Arrangements
will be made so that freshmen may take
rowing instead of Gym. Three crews
will be turned out and races will be held
during Junior Week between the crews
of '20, '21, and '22. The freshman
crew probably can arrange a schedule

(Continued on page 2)

The Tech

Established 1881

Published twice a week throughout the year by the students of the MASSACHUSETTS INSTITUTE OF TECHNOLOGY

Entered as second-class matter, September 16, 1911, at the Post Office at Boston, Mass., under the act of Congress of March 3, 1879. Acceptance for mailing at special rate of postage provided for in Section 1103, Act of October 3, 1917, authorized on July 19, 1918.

MANAGING BOARD

SATURDAY, DECEMBER 7, 1918

SOCIAL LIFE AT THE INSTITUTE.

THE idea of the Army and Navy running dances is a very good one. There never has been enough social life here, and it is high time to start the ball rolling. The Dormitory dances last year were the first thing of the kind. That they were well appreciated there is not a doubt. This sort of thing will not interfere with the studies because the men here will get some recreation of the kind whether the Institute runs it or not. It would not be a bad move if some Sunday night powows and fireside talks were started. There are any number of good men who are always glad to come and talk to Technology men, and when there are prospects of cider and doughnuts, there is generally a good crowd out. The Walker Memorial will be ours soon and some All Technology Informals held there would be mighty popular. Anything that can be suggested that will tend to get the men together where they will know one another better deserves consideration.

A USELESS ORGANIZATION.

THE Interfraternity conference held an informal meeting Tuesday night and as usual they were half a year behind the times. They granted the Fraternities permission to begin rushing with out stopping to consider that about half the Fraternities have been rushing men ever since school began and some during the summer. The Interfraternity Conference has never amounted to anything in the past nor has it ever accomplished anything worth mention. The Institute is fortunate in being free from any complicated rushing regulations over which it would be the function of the Committee to stand the jealous guardian, nor do any of the Fraternities seem at all anxious to be bound down by any. The result is that the Institute has no need for the Committee and would not miss it if it should go out of existence.

Now that the men are together in the barracks it would be well to hand out election papers for the class elections, as it will be much harder for the men to see each other when they are dismissed from the outfit. The elections should come at the very beginning of next term so that the officers can get things going again.

How about having Technology going into inter-collegiate baseball? It was decided that crew should be made a major sport at the Institute last fall. Baseball is a sport that would not take too much outside time during the training season. There is plenty of material at the Institute every year for a good team.

THE TECH regrets to announce the resignation of Maxwell K. Burckett, '21, as Circulation Manager. He expects to remain away from the Institute until next fall because of ill health. THE TECH takes this opportunity to express its appreciation of Mr. Burckett's services, and hopes that he will be with us again next year.

PERSONALS.

In the last issue of THE TECH a letter appeared telling of the experiences of Granville B. Smith. The following picture of him was taken overseas.

CAPT. G. B. SMITH '18

TEA HELD ON FRIDAY

The Technology Womens Association The Technology Women's Association Friday afternoon at 4.30. The purpose of this meeting was to commemorate Mrs. Richards' birthday. The speaker was her husband, Prof. Robert H. Richards. Mrs. Richards was the first woman student at Technology, and it was about this remarkable woman that Prof. Richards talked. Although most Technology women are familiar with Mrs. Richards' life and work as instructor at the Institute for forty-three years, many new and interesting phases of her home life were brought out.

NATIONAL DIRECTOR EXPLAINS WORK OF THE S. A. T. C.

The first authoritative statement on the much discussed organization and demobilization of the Student Army Training Corps in over five hundred American Colleges was made by its national director, President Richard C. Maclaurin of the Institute at the meeting of the American University Association, December 5th at the Harvard Medical School. In it Dr. Maclaurin states the difficulties that lay in the way of a successful organization and showed that the admitted failure of the present scheme can have no bearing on any future possible attempts of the same nature. The full text of the speech will appear in the December 25th issue of THE TECH.

INFORMATION IS GIVEN CONCERNING NEW TERMS

The following information concerning the second and summer terms has been issued by the Registrar. It fully explains all the small points which many students have been wondering about.

Calendar

First term ends December 2, 1918.
First period, 11 weeks, December 30, 1918 to March 15, 1919.
Examinations, March 17 to March 22, 1919.
Vacation, March 24 to March 29, 1919.
Second period, 11 weeks, March 31 to June 14, 1919.
Examinations, June 14 to June 21, 1919.
Summer term, 8 weeks. (First year, Junior grade), July 7 to August 30, 1919.
Examinations, Sept. 1 to Sept. 6, 1919.
School year of 1919-1920 begins October 6, 1919.

Tuition Fees

Tuition fees for the term December 30th to June 14th, will be \$180.00, payable as follows: \$90.00 on or before December 30th, \$90.00 on or before March 31. The fee for the Summer Term, approximately eight weeks, for First Year Class, Junior Grade, will be \$70.00, payable in advance.

Deposits for Laboratory Breakage

All students taking Chemistry, Mining, etc., will be required to make deposits as formerly—\$20.00 for first year chemistry; \$50.00 for subsequent years.

Dormitories

It is expected that the Naval Aviation Detachment will vacate one section of the dormitories in time to be rented to regular Institute students on December 30th. The balance of the dormitories is expected to be available before the end of January. Applications will be considered in order of filing. Rentals will run until the 21st of June. The rentals are as indicated on the Dormitory Circular, except that for all rooms occupied prior to February 1st, a pro rata weekly rental, in addition to term rental, will be charged. No leases will be required, but payment in advance is necessary in all cases.

Dining Service

The Walker Memorial Dining Service, with the exception of the Grill Room, will be discontinued after Saturday, December 7th. The building itself will be closed as soon as it is given up by the Naval Aviation Detachment, and for a period of some weeks it will undergo repairs, painting, furnishing, etc. in accordance with the original plans. During this period the S. A. T. C. Mess Hall will furnish cafeteria service, with a moderate range of menu. Luncheon 12 to 2; dinner 5.30 to 7. The building will not be open for breakfast.

WALTER HUMPHREYS,
Registrar.

ACTIVITIES START

(Continued from page 1)

with the various preparatory schools in and around Boston. The equipment of this organization is in good condition and opportunities for men without previous experience are good. Three new men are to be elected to the managing staff all to be of the class of '22. There will probably be no Varsity team, but since Crew is rated as one of the regular Field

Day sports it deserves attention. The Swimming Team hopes to maintain its record of not being defeated in the past three years, and only one equalled, then by Annapolis. C. D. Greene '21, S. N. T. C., captain of last year's team is still with us. Max Tersee will probably not participate, although he is at present taking the course in Naval Architecture at the Institute. W. H. Young '21, S. A. T. C., Fish Oct. '20, Ortez Oct. '20, a Porto Rico swimmer, C. L. Goucher '21, and J. B. State weather '21 are expected to do good work. Purington and McGhie are expected to furnish the diving. The team will start practice the first of January. It will compete in the inter-collegiate meet March 22nd, will arrange meet with Amherst, Brown, Princeton, Yale, Wellesley, University of Pennsylvania, and Annapolis. The staff will elect an assistant manager and captains will be elected for the second team, the freshman team, and the relay team.

The professional societies at Technology and the Rifle Club are planning to reorganize with the remainder of the activities.

DU PONT AMERICAN INDUSTRIES

Order your new Rayntite Top--now

Have its guaranteed protection against rain, snow and hail for the winter motoring season, if possible. At least make sure you will have it for next spring and summer. The top maker is a mighty busy man. He will be unable to fill all the orders offered him.

With new cars impossible to obtain, the millions of used cars must remain in service. So many of these require new tops to make them sightly and serviceable that only those ordered at once can be supplied. Prompt action enables the top maker to plan for labor and materials that will be difficult to obtain later—it insures getting the top material you should have.

In selecting a top material consider the reputation of the manufacturer and his guarantee. Rayntite Fabrikoid is a DuPont product. It is the only top and curtain material specifically guaranteed for one year, during which time we warrant it not to leak, crack or peel. Made in single and double texture and built to last the life of the car, it retains its shapely, smart attractiveness longer than any similar material.

When cushions need recovering, specify Motor Fabrikoid. It is an economical and beautiful material with wonderful service qualities. Any good auto trimmer can furnish Motor Fabrikoid and do the work.

Orders placed now save money and disappointment later. Samples of Rayntite and Motor Fabrikoid sent on request.

NAVAL UNIT TO DEMOBILIZE

(Continued from page 1)

ably be out on Monday. The men in this class have been relieved of all their academic work, and are at present employed on guard duty, fatigue duty, in the quartermaster's department, etc. There is no exact schedule by which the men are being discharged, but the authorities are trying to follow one as closely as possible.
For the benefit of those who expect to continue courses at the Institute, it has been arranged that only one day will be taken to discharge each one, so that a man will not miss more than one day of work. He will receive his physical examination, sign his papers, and be free at five o'clock of that day. Freshmen under eighteen in the S. A. T. C. may get out as soon as they wish, unless they have failed to meet their obligations with the Bursar. The headquarters staff will remain until the beginning of January, as there is a large

amount of clerical work to be done after the demobilization, and all the papers must be sent to the Adjutant General's office.
